# Your Attention

**BEFORE ORDERING is called to the following; please read carefully**

ORDER EARLY—It avoids disappointment by eliminating the chance of the variety selected being sold out.

STOCK—I ship only first quality stock, clean, healthy and true to name. I will gladly replace or refund original purchase price should any prove otherwise.

SUBSTITUTION—I do not substitute unless directed to do so. However, a second choice is advisable if late in the season.

SIZE—Our bulb sizes are standard and liberal.

**Large** —1¼ inches or more in diameter (Nos. 1 and 2).

**Medium** —¾ to 1¼ inches in diameter (Nos. 3 and 4).

**Small** —¼ to ¾ inches in diameter (Nos. 5 and 6).

QUANTITY—3 bulbs will be sold at the 10 rate; 25 at the 100 rate; 250 at the 1,000 rate.

SHIPMENTS—Weather conditions govern this largely. They usually start about March 15th. Unless otherwise directed.

DELIVERY—All orders amounting to \$1.00 or more will be delivered free to all parts reached by Parcels Post. Orders amounting to less than \$1.00 will add 15c for postage.

TERMS—Remittance should accompany your order, except when shipment is to be made C. O. D. Foreign countries including Canada, will please remit by Postal Money Order.

REFERENCE—For our standing, you may refer to:

The National City Bank of Cleveland, Ohio.

The McDowell National Bank of Sharon, Pa.

PRICES—having a number prefix, as **2-.05**, means **2 for 5 cents**.

Prices as given in this catalog supersede all previous quotations.

SERVICE—We offer the best, with courtesy, being fully appreciative of your patronage.

INSPECTION—Our stocks are federal and state inspected.

# **STEWART OFFERS THE LARGEST AND MOST COMPLETE COLLECTION OF GLADIOLUS IN THE WORLD**

We have gone to the farthest corners of the globe wherever gladiolus are produced that we might have the very best to offer you in this catalog; they are the very finest varieties, consistent prize-winners. Their quality was reflected in our display in Horticultural Hall at a Century of Progress in Chicago in 1934.

## **YOU MAY HAVE THEM**

In your garden—this year. You may enjoy them just as thousands of others have done, who write us enthusiastically of how beautiful their flowers were from our bulbs, others of the many prizes they had won at various shows from the community shows, the state shows to the national show.

## **PRICED LOW**

Our prices are perfectly clear and plainly stated, they are for the very highest quality of bulbs, courteous and liberal handling of your order.

## **THE HIGHEST QUALITY**

We own and devote over 200 acres to the scientific production of high quality bulbs, our buildings are spacious and modern permitting of the most thorough curing, cleaning and storage. Only thoroughly experienced help are employed, and the most modern equipment used; this gives us efficiency enabling us to offer the best quality at a very reasonable price. The office and shipping departments are equally well equipped to execute your order with the greatest care and exactness. This assures you of the best quality bulbs, entirely free from disease or insect pests, low in price and ready to produce wonderful blooms for you.

*PRESIDENT—THE AMERICAN GLADIOLUS SOCIETY.*

## IMPORTATIONS

Many of the most beautiful gladiolus in our gardens today have come from countries other than our own. They include many of our best blues and a very complete range of other colors in exhibition, commercial and other types. To touch but briefly on some of the more popular we call attention to Albatross, Commander Koehl, Aida and many others by Pfitzer of Holland; Mair of Scotland gives us Berty Snow, Gloriosa, King George and others; then the always popular French varieties by Lemoine: Mme. Monnet Sully, Mme. Geo. Bonlay, Rouget de Lisle and others which all carry the chic appearance. From Australia comes Marmora, Mrs. S. A. Errey, Emile Aubrun and several newer ones, which when better known, will become in their turn very popular. This originator is Australia's leading producer although there are several others that have produced excellent new varieties and certainly are worthy of our growing. New Zealand too has contributed recently with Miss New Zealand, which promises to become very popular as our largest gladiolus.

Following we give a list of originators and their country. In parenthesis the name, or its abbreviation, will appear immediately after the variety name throughout the catalog:

(PF) Wm. Pfitzer, Holland	(Errey) Australia
(Velthuys) Holland	(Fallu) Australia
(Zeestraton) Holland	(Symons) Australia
(Alkemade) Holland	(Phillips) Australia
(Guellmans) Holland	(Gilrey) Australia
(Lemoine) France	(Crow) Canada
(Mair) Scotland	(Groff) Canada
(Julyan) New Zealand	(Palmer) Canada
(Doney) New Zealand	

## BULB PERFORMANCE

For the maximum performance or exhibition spikes—

**Large** (over 1¼") bulbs are much to be preferred;

**Medium** (¾ to 1¼") bulbs are of blooming size but usually not as large and requiring more time to bloom;

**Small** (¼ to ¾") bulbs will at times bloom late in the season and are noticeably smaller in size;

**Bublets** cannot be depended upon, either to bloom or for germination, many fail to grow under the very best of conditions.

# We Again Offer Our New Introductions at Popular Prices

## OUR INTRODUCTIONS FOR 1935

We offer three excellent varieties this year and believe they warrant your consideration even more than did our previous productions.

**ALICE HARRIOTT.** A beautiful shade of rich cherry-rose, with just a cast of blue to the upper throat. The eight or more large flowers open at one time are nicely placed on a tall, always straight strong spike, carrying well 20 or more buds. A good grower and certain to become very popular.

Large \$5.00 each Medium \$3.75 each Small \$2.50 each Bulblets \$1.00 each.

**ELITE.** The florets are gracefully waved and large, which materially adds to the beauty of this distinctive salmon-pink to peach-red flower, with its creamy Neopolitan throat and median lines. The spike is very tall and strong with 18 or more buds, eight or more open flowers. A fast propagator and a particularly valuable new variety.

Large \$5.00 each Medium \$3.75 each Small \$2.50 each Bulblets \$1.00 each.

**MARGARET STEWART.** This is the most beautiful shade of rich red-red-rose and practically a self color. A tall, strong spike carrying 16 or more buds with four or more large open flowers. A particularly meritorious variety.

Large \$5.00 each Medium \$3.75 each Small \$2.50 each Bulblets \$1.00 each.

## OUR 1934 INTRODUCTIONS

These varieties were especially admired in my display at Horticultural Hall at a Century of Progress, Chicago, 1934:

**EUCLID.** A very large soft white flower, delicately blushed pink toward edges of petals, soft cream cast to throat. The very tall, strong spikes carry 16 or more buds with five or more open flowers well spaced. Good producers.

**TOTEM.** Very tall striking variety with large round flowers of bright salmon-scarlet. It opens five or more flowers at one time with 16 or more buds. Very strong grower and rapid propagator.

**COLFAX.** The flowers are of medium size, a beautiful shade of bright deep violet, a distinctive shade. A very popular variety with our visitors.

Prices on EUCLID, TOTEM and COLFAX:

Large \$1.50 Medium \$1.00 Small \$.75 Bulblets \$.40

**PHYLLIS McQUISTON.** Easily the most outstanding and beautiful variety in my display at Horticultural Hall at a Century of Progress. Several prominent growers predicted that it would easily be among the first ten in the symposium when better known. This is a large, deep, glowing shrimp-pink to a lighter throat, perfectly clear. The spike is tall and erect, carrying 18 to 20 buds with five or more of the large flowers open at one time. It is of vigorous growth, best of substance and an excellent propagator.

## ASSORTMENTS

Those who do not care to grow the varieties separately and by name, but who do want the very best of flowers, will find the following assortments will more than satisfy. The very large number of varieties which I grow are representative of the best efforts of the leading originators from all over the world. This enables me to offer you ASSORTMENTS THAT ARE UNEQUALLED in wide color range, choice varieties and quality stock. This includes plain petaled, ruffled and other types of flowers. The various varieties are not labeled as to their names. Please order by number.

**No. 1.** This is our most popular assortment, all large flowers. We have large numbers of complimentary letters on this collection. It will please you. Over 40 different varieties. 100 "L" bulbs, \$2.20; 50 "L" bulbs, \$1.10; 25 "L" bulbs, 60c.

**No. 2.** Primulinus. This assortment contains about 30 different varieties of this artistic type. The color range is very wide and includes plain and ruffled petaled varieties. For those who prefer this type which is so desirable for table decoration, this assortment cannot be equalled at this very low price. 100 "L" bulbs, \$2.20; 50 "L" bulbs, \$1.10; 25 "L" bulbs, 60c.

**No. 3.** This assortment is the same as No. 1, except that it has many of the newer and higher priced varieties. A real value. 100 "L" bulbs, \$4.25; 50 "L" bulbs, \$2.20; 25 "L" bulbs, \$1.20; 12 "L" bulbs, 70c.

Medium size bulbs of the above offers at one-half the price.

The above assortments are GUARANTEED clean, healthy stock. If you have a preference of any particular color, I will be happy to put forth every effort to meet your request, in any of the above assortments.

**THE AMERICAN GLADIOLUS SOCIETY**—the largest society of its kind—issues the "Gladiolus Review." Its pages are devoted to subjects of interest to all who grow Gladiolus. Membership and "The Review" for \$2.00 per year. Sec'y, R. Huff, Goshen, Ind.

## CARE AND CULTURE

THE GLADIOLUS can be successfully grown in practically any part of our U. S. They are easily grown and respond wonderfully to a little attention, such as timely watering and cultivation. They will adapt themselves to most any garden and will be found doing much better than most flowers with an equal amount of effort by the grower, be they amateur or professional.

THE PACKAGE when received should be opened at once to admit air directly on bulbs—store in cool, dry and frost-proof place until planting time.

SOIL—Any good garden soil is very satisfactory; it is important that the soil should not be worked when wet, and should be kept pliable at all times during the growing season.

LOCATION—They will not do their best in too much shade. They enjoy being planted in rows or in beds; they are valuable in the landscape, putting clumps of all one color or mixed at suitable points for the desired effect. The ground should be well drained for best results.

DISINFECTING—This is advisable, as it will practically eliminate any disease or insect pest. I offer but one method: this accomplishes all in one operation; use at the rate of one ounce of Bichloride of Mercury to 10 gallons water (B. of M. is more soluble in warm water), soak from 8 to 10 hours, the night before planting, (not necessary to remove husks); they may be planted wet.

PLANTING—Have soil loose; make trench or hole deep enough so that bulbs can be covered with three inches of dirt, (sandy soil, five inches); plant bulbs three inches apart in the row. If fertilizer is used at planting time, keep at least two inches from bulb, by covering bulb with dirt before adding the fertilizer.

WATER and CULTIVATION—Water thoroughly so that it will soak down to the bulb, at least once a week, but count a good rain as one, cultivate thoroughly next day if not sticky.

THE FLOWER—If you wish to cut the flower do it when the first flower opens wide, to get a nice spike with it slide the knife down close to spike on one side, stopping six to eight inches from ground, then slide it down the opposite side giving knife a twist at the bottom to remove spike with flowers; this operation cuts leaves from spike but they remain on the plant, which is essential to properly mature the bulb.

HARVESTING—Bulbs should be ready to dig three to six weeks after blooming or dig when foliage starts to turn brown. Loosen bulb with fork or other tool and bulb will lift out by the top—shake dirt off—cut tops off close to bulb, let bulb fall in clean container (three inches deep), pile up tops for burning. Let bulbs cure three to six weeks in a dry, airy, frost-proof place, stir occasionally for thorough drying—they must be dry. When ready, the old root should snap off easily, leaving bulb clean; now store away for winter in containers (boxes or bags) not over four inches deep, in a cool, dry, frost-proof place.

**Our stock is clean, healthy, thrip free and true to name.**

# The "All-Weather" Plant Marker

**BOTANICAL GARDENS AND ESTATES USE THEM**
